

6th International Exhibition

Automobiles, Spare Parts,
Service Equipment

AUTO&PARTS UZBEKISTAN 2010

16 - 18 November, 2010, Uzexpocentre, Tashkent, Uzbekistan

AUTO&PARTS UZBEKISTAN 2010 - MEETING PLACE FOR THE PROFESSIONALS OF THE INDUSTRY!

Automobile industry is the youngest and at the same time intensively developing branch of the modern Uzbekistan. Auto&Parts Uzbekistan - is a meeting place of leading producers and dealers of the industry, suppliers and consumers from European, Asian and CIS countries. At the present moment, development of the new branch requires modern technology introduction, effective search of raw material suppliers, investors for joint production of deliverables and spare parts for industries. These factors stipulate the topicality of the exhibition.

AUTOMOTIVE INDUSTRY REVIEW

- Uzbekistan is the first state of the Central Asia which started producing vehicle. Most of the local affiliated with "Uzavtosanoat" Joint Stock company, including GM UZBEKISTAN, JV, which produced it's millionth automobile in 2008. There are joint-ventures in automotive industry with such companies as: GENERAL MOTORS, MAN, ISUZU e.t.c. "Uzavtosanoat" is planning to open six joint ventures in Fergana and Navoi regions, producing components and spare parts for automotive industry.
- Annual growth of Uzbekistan automobile fleet comprises approximately 30%.
- Total stretch of roads in Uzbekistan is 146,4 thousands km., nowadays, 42,5 thousands km. of which – arterial roads for general use, including 3,2 thousands km – highways of international and 18,8 thousands km of governmental importance. There are 20 international traffic routings going through Uzbekistan.
- According to the Program of roadside infrastructure and service development, during 2010-2015 years it is planned to build: 75 automobile gas-filling and refuelling stations, 59 automobile gas-filling compressor stations, 73 service centres, 47 parking places. It is expected, that after implementing the Program international and transit traffics will be increased up to 50%, cargo and passenger traffic up to 60-70%.
- According to reports, the highest growth among industries sectors was fixed in sectors of machine building and metal-working manufacturing (117,5%).
- The largest volume of freight services and transportation is carrying out by motor transport.
- According to the governmental programs, part of automobile fleet is being transferring from petrol filling to liquefied petroleum gas and compressed natural gas filling, thus 138 auto gas filling compressor stations and 952 auto gas stations are planning to be built by year 2012.
